

RISE RENOVATION × GROWTH MINDSET

Decisions before we turn the tap on.

Directionally we're aligned. First 30 days is , not an audit.
Scorecard is full funnel through CAC — a cheap lead that never sells is expensive.
CallRail is in before a dollar of media. This page is the short list I need from you so
September 1 is a start date, not a discovery date.

TICKET

\$17,100

CONTRIBUTION

33.8%

MAX CAC

\$2,900

NET CLOSE

24%

PLAN CONVERSION

2–4%

30-DAY TEST

\$15–25K

Your numbers, locked from the 26th. If anything moved, we adjust Tuesday before we're on the clock. Digital Run Rate stays signed contracts in a trailing 30 days × 12 — \$15MM means \$1.25MM inside a window, not an upfront promise.

WHAT WE'RE TESTING

3–4 named sources. One response engine. ~30 days each to prove \$2,900 CAC, then remove or fund. Planning case is 2–4% lead-to-sale because nothing in the CRM supports 4–6% on a purchased lead. Paid search / LSA at \$200 and 3% destroys value; we will not spend into that. Shared inventory is cheaper and slower; exclusive is dearer and cleaner. We never compare on CPL.

Paid traffic lands on dedicated roof and windows pages we own — not a WordPress rebuild of riserenovation.com. Same GA4 property you already have. Tools are Rise opex, roughly \$600/mo, outside the media cap.

CONFIRM THESE STILL HOLD

- ☐ Numbers above are still current — \$17,100 · 33.8% · \$2,900 · 24% · 2–4%.
- ☐ Metric is signed contracts, not invoiced revenue (44-day lag).
- ☐ Blank source never counts as digital. Catch-all ~14% stays out.
- ☐ Rehash of the existing database does not count toward Digital Run Rate.
- ☐ No media dollar until CallRail is on the pages.

NEED FROM YOU TUESDAY

- ☐ Denver zip list / territory, in writing. Vendors cannot quote without it. **NICK**
- ☐ Product order: roof + windows first? Gutters only with a roof? **NICK**
- ☐ Permission to name Rise to vendors. **NICK**
- ☐ Who answers (720) 295-7451 today — service, CSR, or reps? Hours vs Mon–Sat 8–7 MT. **NICK**
- ☐ You're building source / campaign / UTM. I'll hand you a 12-field list so we don't get two schemas. Source field is 98% empty, which helps. **NICK**
- ☐ Dedupe: household active in the last 12 months vs any prior Salesforce record. I want canvass history not to eat new digital credit.
- ☐ DNS / hosting contact for riserenovation.com (landing pages live off WordPress). **NICK**
- ☐ EIN + legal name Rise Renovation LLC this week, for 10DLC. SMS is dark until carriers approve. **NICK**
- ☐ Standing weekly 30 minutes: every source scale / optimize / pause. No middle ground.
- ☐ Measurement tools sit in Rise's name and sit outside the media cap.
- ☐ Confirm hours: Mon–Sat 8am–7pm MT, closed Sunday. **NICK**

☐ Insurance / storm work: in or out of the digital test.

NICK

WEEK 1 FROM THIS SIDE — \$0 MEDIA ON PURPOSE

- ☐ File 10DLC under Rise. Carrier clock starts day one.
- ☐ CallRail live, one number per source.
- ☐ 12 fields + write-once rule, using the tags you're building.
- ☐ Roof + windows landing pages (not WordPress). Same GA4. POST into the engine.
- ☐ Intake: validate → consent → dedupe → Salesforce. One test lead into the run-rate report before any spend.

The one thing I don't know and can't guess: **who answers the phone**. Until that's named, we will not buy Google LSA. Everything else on this page is enough to start September 1 as flow, not an audit.
