

The Rise Playbook

Customer-First Interaction · Speed to Lead · Engagement Engine · SOPs

From inquiry to appointment — how we work every lead, starting now.

This is an evolving process, and this is our handbook. Everything in here is how Rise engages a homeowner from the second they ask for an estimate to the moment an appointment is on the calendar. It will change as we learn — the current version always lives in the shared drive — but from today, this is the page everybody works from.

Prepared by Growth Mindset AI for Nick Ventura, Christina Perry and the Rise team · Sept 25, 2026

What's in the playbook

1. The one rule

Be first, then be persistent — and why.

2. The first sixty seconds

What happens automatically, second by second, with the exact texts and email.

3. The seven-day cadence

Six calls, three texts, three emails. Who does which.

4. On the call

What to say, what to book, what to log.

5. Appointments, replies and credits

Protecting what we booked and getting money back on bad leads.

6. Who does what

Engine · Desk · Voice AI — every touchpoint assigned.

7. How we know it's working

The control system and the numbers we hold ourselves to.

Applies to every purchased lead. Modernize, HomeBuddy, ResultCalls, Blue Fire, Networx and whoever comes next. The vendor changes; the process does not.

The Rise Playbook · v1.0 · Source: chat jcEPaY4b, 2026-09-25 · Message wording is the September 25 starter set; the desk owns revisions.

Be first, then be persistent.

A homeowner who fills out a form is talking to three or four contractors at once. The first one to reach them wins the appointment about 80% of the time. After that first minute, the winner is whoever keeps showing up — six attempts across seven days, on more than one channel — without becoming a pest.

30s

Vendor-graded standard for first contact. Rise texts and emails in about 6 seconds.

4x

Lift in contact rate from calling within the first minute versus the first hour.

80%

Of the time, the first contractor to make contact gets the appointment.

50%

Of homeowners prefer text or email to a phone call. The text opens the door; the call walks through it.

Three habits that make the rule real

- **Dial the second it lands.** The #leads alert and the Salesforce list are the signal. Two calls back to back ("double tap"), then move on.
- **Never skip a day of the cadence.** The task list decides what gets called today, not memory.
- **Log it or it didn't happen.** Every attempt in Salesforce the moment it ends — that record is also how we win credits from the vendor.

What happens automatically

Time	What happens	Who / what
0:00	Homeowner submits a request on a vendor site.	Vendor
0:00–0:02	Vendor posts the lead to Rise's lead engine. It checks the ZIP is in our service area, the phone and email are valid, the consent record is present, and that it isn't a duplicate.	Engine
0:02–0:05	Lead is created in Salesforce and assigned to the confirmation desk. Salesforce posts it to #leads: <i>New lead · Modernize · 11:04 AM MT · name · Denver 80205 · Windows.</i>	Salesforce
0:05–0:08	Text #1 and Email #1 go to the homeowner. Salesforce logs "Auto text + email sent" on the lead.	Engine
0:08–1:00	Desk sees the alert and dials — twice, back to back.	Desk
+4 hours	No reply and no contact yet → Text #2 , the no-reply nudge.	Engine
Any time	Homeowner texts back → logged on the lead in Salesforce ("Text reply: ...") and posted to #leads → call them.	Engine → Desk
On booking	Homeowner replies YES (or the desk books) → confirmation text.	Engine

Measured on the live system, Sept 25: Slack alert, text, email and the Salesforce log all completed **6 seconds** after the lead was created. Vendors grade contractors on contact within 30 seconds and a text within 2 minutes of a missed call. Rise does both before a human has picked up the phone.

The messages, word for word

All texts come from Rise's toll-free (866) 528-7644; the desk line (303) 827-0610 is named inside the text so the homeowner recognizes the callback. Texts send 8am–9pm Mountain only (anything later queues for 8am). Every first text carries STOP; opt-outs are honored instantly across every lead with that number. *[first name]*, *[product]*, *[street]* fill from the lead.

TEXT #1 — THE INSTANT YOU'RE IN (SECOND 5)

Hi *[first name]*, it's Christina at Rise Renovation — we got your request for a free *[windows]* estimate at *[street]*. I'm calling you now from (303) 827-0610. If now's not good, reply with a day and time that works. Reply STOP to opt out.

EMAIL #1 — SAME SECOND · FROM THE RISE MAILBOX, REPLY-TO CHRISTINA · SUBJECT: YOUR WINDOWS QUOTE REQUEST — RISE RENOVATION

Hi [first name] ,

This is Christina at Rise Renovation. We received your request for a [windows] estimate in [city] , and I'm calling you now from (303) 827-0610.

If now isn't a good time, just reply to this email or text me at (303) 827-0610 with a day and time that works and I'll get you on the calendar.

Talk soon,
Christina Perry · Confirmation Desk · Rise Renovation · (303) 827-0610

TEXT #2 — NO REPLY AFTER 4 HOURS

Still want the free [windows] estimate from Rise Renovation? Reply YES or a day that works (e.g. THU PM). Reply STOP to opt out.

MISSED-CALL TEXT — HOMEOWNER CALLED BACK AND MISSED US

Rise Renovation — sorry we missed your call about a [windows] estimate. Reply with a good time today and we'll call right back. Reply STOP to opt out.

ACKNOWLEDGEMENT — HOMEOWNER TEXTS A DAY OR TIME

Thanks [first name] — a Rise scheduler will text you shortly with times for your [windows] estimate.

CONFIRMATION REQUEST — ONCE A TIME IS SET

Hi [first name] , Rise Renovation here — we have your [windows] estimate for [Thursday at 2:00 PM] . Reply YES to confirm, or 1 if an earlier time this week would be easier. Reply STOP to opt out.

CONFIRMED — AFTER YES

Confirmed: [windows] estimate [Thursday at 2:00 PM] , [street] . A Rise scheduler will text the day before. Questions? Reply here.

STOP / HELP — CARRIER-REQUIRED

Rise Renovation: you're opted out and won't receive more texts. Reply START to opt back in.
Rise Renovation appointment & estimate texts. Msg frequency varies; msg & data rates may apply. Reply STOP to opt out. Help: riserenovation.com.

How replies are read before anyone looks

Homeowner says	The engine does
YES / OK / sounds good	Marks the appointment confirmed and sends the Confirmed text.
A day or time ("Thursday afternoon", "tomorrow AM")	Sends the acknowledgement; logs "proposed a time — call them" on the lead; posts to #leads.
"Earlier" / 1	Logs "wants an earlier time"; posts to #leads.
STOP	Opts the number out everywhere, sends the STOP text, logs it.
Anything else	Logs "needs a human — call them"; posts to #leads.

The desk never replies from the 866 number — call, or text from the (303) BeeTexting line.

Six calls, three texts, three emails.

The person only owns the calls; the machine owns the rest. Peak answer windows are 8am–noon and after 5pm Mountain — that's where the dial blocks go.

Day	Calls (human)	Text (auto)	Email (auto)	Note
1	2 — first call the minute it lands (double tap); second call 3–4 hours later	#1 at second 5; no-reply nudge at +4h	#1 at second 5	A missed call is answered by the text that names the project
2	1 — different time of day than Day 1	1 follow-up	—	Never three touches in one hour
3	1 — different time again	—	1 follow-up	
4–5	2 — spaced out; urgency is cooling	1 re-engagement	—	
6–7	—	—	1 final re-engagement	Prepare to retire or switch channel
7+	Document the stop. The lead moves to nurture — monthly touches, seasonal offers. Leads don't die; they go quiet.			

Day 1 belongs to the desk

Both Day-1 calls are made by whoever is on the desk the moment the lead lands. Nothing else on the desk outranks a fresh lead for those two dials.

Days 2–5 come off the task list

Salesforce creates the cadence calls as tasks on every lead. "My open tasks due today" is the call list. Completing the task with an outcome is the log.

What to say, what to book, what to log.

Call-center best practice, in Christina's voice. She doesn't have to read it — it's the shape of a good call: lead with their request, offer two times, book, confirm, log. Every script assumes the homeowner already got the text that says "I'm calling you now."

LIVE ANSWER — DAY 1, THE DOUBLE TAP

"Hi [first name], it's Christina with Rise Renovation — you just asked for a free [windows] estimate at [street], so I'm calling right away. I've got a couple of openings this week — is Thursday afternoon or Friday morning better for you?"

If they pause: "It's a free, no-pressure look at the [windows] — about 60 to 90 minutes, and you'll have real numbers before we leave."

BOOKING — LOCK IT DOWN

"Perfect — Thursday at 2. I've got [street], [city]. Will everyone who'd be part of the decision be home? Great. And it's [4 windows / the front of the house], right? You'll get a text from me in a minute confirming Thursday at 2, and a reminder the day before. Anything you'd like the estimator to know ahead of time?"

VOICEMAIL — DAY 1 (SHORT, NAMES THE REQUEST)

"Hi [first name], Christina at Rise Renovation — calling about the [windows] estimate you requested for [street]. I just texted you too; reply with a day that works, or call me back at (303) 827-0610. Talk soon."

VOICEMAIL — DAY 3 (DIFFERENT TIME OF DAY)

"Hi [first name], Christina with Rise again. Still holding a spot this week for your free [windows] estimate at [street]. Text me a day, or call (303) 827-0610 — happy to work around your schedule."

VOICEMAIL — DAY 5 (LAST CALL; LEAVE THE DOOR OPEN)

"Hi [first name], Christina at Rise Renovation. This is my last call for now on the [windows] estimate — no pressure at all. If the timing's better later this month, just text me and I'll set it up. (303) 827-0610. Take care."

When they push back

They say	Christina says
"I'm just getting quotes."	"Perfect — that's exactly what this is. It's free and you'll have Rise's number to compare against. Thursday or Friday?"
"I already have someone coming out."	"Great — get a second set of eyes. Most of our customers had two or three quotes; ours takes about an hour. Would after theirs work, or before?"
"What's it going to cost?"	"Honest answer: it depends on the windows and the house, and I'd rather give you a real number than a guess. That's what the visit is for. Thursday or Friday?"
"I didn't request anything."	"No problem — you'd have filled out a form on <i>[the site]</i> about <i>[windows]</i> at <i>[street]</i> . If that wasn't you, I'll take you off our list right now." (Then log it — this is a possible credit.)
"Not right now."	"Totally fine. When's better — a couple of weeks, or after the holidays? I'll put a note in and reach back out then." (Set the follow-up task.)
"Just email me something."	"I'll send it now. Fair warning, it's a range — the estimate visit is what makes it real. Want me to hold a tentative slot while you look?"

Inbound calls from a pay-per-call vendor — the 90-second rule. Vendors like ResultCalls bill for a connected call once it runs past about 90 seconds; a shorter call is creditable. So the first minute of every inbound call is a **qualify-or-release** minute, in this order, before any selling:

1. **Where** — "What's the address or ZIP for the project?" (in our service area?)
2. **What** — "And this is for windows / roofing / a bath?" (a trade we sell?)
3. **Who** — "Are you the homeowner?"
4. **How much** — "Roughly how many windows?" (meets the minimum: 4 windows, or 2 + a sliding glass door)

Any answer that fails → end warmly inside 90 seconds: "I appreciate the call — that's outside what we do, so I don't want to waste your time. Best of luck with it." Then log **Dead NO CREDIT** with the reason, same minute. A qualified caller gets the booking script above. Moving fast here isn't rude; it's what keeps bad calls off the invoice.

Non-negotiables on every call

- **Book on the call.** Confirm the address, who needs to be home (all decision-makers), and the project. Windows minimum: 4 windows, or 2 windows plus a sliding glass door (one door counts as two windows).
- **Offer two times, never an open question.** "Thursday or Friday?" closes; "when's good?" stalls.
- **Log every attempt the moment it ends** — attempt number, outcome, next step. The vendor will not credit a lead we can't show we worked.
- **Set the status honestly:** New – Inquiry → No Contact Made → Appointment Requested → Appointment Set → Dead, or Dead NO CREDIT when the lead was bad.
- **Anything odd** — wrong trade, out of area, disconnected number, prior customer — note it on the lead and flag it in #leads the same day. That's the credit clock starting.
- **Test leads** (TEST, Jack Doe, Jenny Doe) are never called.

Protect what we booked. Get paid back for what was bad.

Appointments

- Confirmation text the same day; reminder the day before and the morning of. Voice-AI confirmation calls follow in October.
- A no-show is not a dead lead: re-book within 24 hours, two attempts, then hand back to the desk.
- Every set appointment is reported back to the vendor weekly — Lead ID, appointment, demo, sold, net job sold. That report is how we win credits and how the vendor tunes what they send us.

Replies

Every homeowner text lands on the lead in Salesforce as a completed task ("Text reply: ...") and in #leads. Either one means the same thing: call them. Nothing to check, nothing to repost.

Credits

Form leads: most vendors credit leads that are out of area, duplicates, wrong trade, or wrong/disconnected numbers — **if we ask inside their window (typically 10 days) with the Lead ID and a reason.** The desk flags it by setting **Dead NO CREDIT** with a note; Growth Mindset files the request. Leads we simply couldn't reach after six attempts are ours to keep — that is the cost of the model, and why the cadence matters.

Pay-per-call: a call that ends inside ~90 seconds is creditable; a qualified call that runs longer is billable whether or not it books. Disqualify fast, log **Dead NO CREDIT** with the reason, and Growth Mindset files the credit the same week.

Humans make first contact. Machines do everything that repeats.

Vendor consent on a purchased lead covers texts and human calls; it does not cover AI-placed outbound calls to a homeowner who hasn't spoken to us yet. So the first live voice is always a person. Once a homeowner has engaged, voice AI takes the transactional work.

When	Touch	Owner	How	Status
Day 1, sec 5	Text + email	Engine	Salesforce → engine	LIVE
Day 1, min 0	Call 1 (double tap)	Desk — Christina	#leads alert + desk list view	LIVE
Day 1, +3–4h	Call 2	Desk — Christina	Cadence task	Sunday
Day 1, +4h	No-reply text	Engine	Scheduled job	LIVE
Day 2–3	Calls 3–4	Christina / Chris (3–5pm block)	Cadence tasks	Sunday
Day 2, 3, 4–5, 6–7	Follow-up texts + emails	Engine	Scheduled job	Sunday
Day 4–5	Calls 5–6	Chris (3–5pm block)	Cadence tasks	Sunday
Day 7+	Retire or nurture	Engine flags · desk sets status	"No contact after 6" report	Sunday
On booking	Confirmation text	Engine	YES → Confirmed	LIVE
Day before / morning of	Reminder texts	Engine	Scheduled job	Sunday
Day before	Confirmation call	Voice AI	Retell → Salesforce + #leads	Week of Oct 5
No-show	Re-book ×2 in 24h	Voice AI, then desk	Retell + task	Week of Oct 5
After hours	Inbound callbacks	Voice AI answers, books a callback window	Retell inbound	Week of Oct 5
Any reply	Classify, log, alert	Engine	Reply → Salesforce task + #leads	LIVE

Voice AI takes over (in this order)

1. Day-before confirmation calls · 2. Reschedules — offers two slots, books, re-confirms · 3. No-show recovery · 4. After-hours inbound · 5. Nurture stays text/email only.

Voice AI never does

First contact on a purchased lead, anything before the homeowner has engaged, pricing or scope conversations. Those stay human.

Capacity — the honest math

Per lead, the human work is six dial attempts (about two minutes each with logging) plus live conversations — roughly 15–20 minutes over seven days.

New leads / day	Dials / day at steady state	Human hours / day	Who
10 (Modernize alone, from Sept 28)	~60	~2.5 incl. conversations	Christina, with Chris on the Day 4–5 block
15	~90	~3.5	Christina + Chris daily — the ceiling for two part-time hands
20–25	120–150	One full-time seat (industry rule: 1 agent = 20 leads/day = 150 dials)	A dedicated Lead Desk Specialist

Staffing plan. Now: Christina owns Day 1 and inbound; Chris takes a fixed 3–5pm MT block for Day 2–5 calls. **Trigger to add a person:** five straight weekdays at 15+ new leads/day, or the day volume steps up with the next vendor — post the role now so it's ready. One Lead Desk Specialist, 8–5 MT covering the 8–noon and 5–6pm answer windows, paid on appointments set and confirmed. With texts, emails and the task list already running, it is an entry-level seat, not a sales hire.

The control system and the numbers.

The control system

- **Cadence tasks, created automatically.** Six call tasks with due dates land on every new lead. "My open tasks due today" is the call list; completing the task with an outcome is the log.
- **The desk list view** ("Internet Leads – Desk") stays the Day-1 cockpit: new leads, Called Today, Desk Category, Desk Note.
- **Two automatic posts to #leads, 4:30pm MT daily:** cadence tasks overdue (lead, day, owner) and leads with no logged attempt in 24 hours. Non-zero two days running gets raised.
- **Weekly scorecard** in the Friday brief: contact rate, set rate, attempts per retired lead — per vendor. Same data feeds the vendor's disposition report, so the reporting is free.

What "good" looks like, per vendor, per month

≥60%

Contact rate — reached
a human

≥30%

Appointment-set rate —
of contacted

≥80%

Set-to-confirmed

6

Logged attempts (or a
booked appointment)
before any lead is retired

Any vendor that misses these for two straight weeks gets reviewed with them, then paused if it doesn't move. Volume never overrides quality.

This document evolves. Wording changes when the desk improves it; steps change when the data says so. The version in the shared drive is the current one, and every change is dated. If what you're doing doesn't match this page, one of the two needs to change — say so in #leads.
