

The Rise Playbook

Customer-First Interaction · Speed to Lead · Engagement Engine ·
SOPs

From inquiry to appointment — how we work every lead, starting now.

This is an evolving process, and this is our handbook. Everything in here is how Rise engages a homeowner from the second they ask for an estimate to the moment an appointment is on the calendar. It will change as we learn — the current version always lives in the shared drive — but from today, this is the page everybody works from.

Prepared by Growth Mindset AI for Nick Ventura, Christina Perry and the Rise team · First issued Sept 25, 2026 · This version October 2, 2026

CONTENTS

What's in the playbook

1. The one rule

Be first, then be persistent — and the three non-negotiables every lead is worked to.

2. The first thirty seconds

What happens automatically, second by second, with the exact texts and emails that go out today.

3. The 45-day lifecycle

Ten days of active cadence, a month of nurture, then Rise owns the lead — and the campaigns that follow.

4. On the call

What to say, what to book, what to log — and how we talk about Rise.

5. Appointments, replies and credits

Self-booked appointments, reminders, protecting what we booked, and getting money back on bad leads.

6. Who does what

Desk · Engine · Mission Control · Voice AI — every touchpoint assigned, who approves what, and the kill switch.

7. How we know it's working

The control system, the red lines we hold ourselves to, and how sales are counted — gross, installed, net.

8. Appendix — Where to look

The Salesforce boards, by seat: what each one answers and what good looks like.

Applies to every purchased lead. Modernize, HomeBuddy, ResultCalls, Blue Fire, Networx, Home Appointments and whoever comes next. The vendor changes; the process does not.

New in version 1.2 (Oct 2). The three non-negotiables on page one · the 30-second standard everywhere (never "a minute") · every automatic text and email now carries the homeowner's personal link to book online, and the wording in §2 is what actually goes out · the seven-day cadence becomes a **45-day lifecycle** (§3) with nurture and the after-45 campaigns · callers get no automatic text or email · self-booked appointments and how the desk confirms them (§5) · Mission Control, approvals and the kill switch (§6) · the hire profile · the ledger red lines and the won / closed / lost definitions (§7) · the boards appendix.

The Rise Playbook · v1.2 · Source: chat jcEPaY4b, 2026-09-25 (v1.0) · chat be99hgGs, 2026-09-26 (v1.1: the sales numbers) · chat hyeaVEfq, 2026-10-02 (v1.2: the 45-day lifecycle, the three non-negotiables, live message wording, self-booking, Mission Control, approvals and the kill switch, the ledger red lines) · Message wording is the engine's live copy as of Oct 2; the desk owns revisions.

Be first, then be persistent.

A homeowner who fills out a form is talking to three or four contractors at once. The first one to reach them wins the appointment about 80% of the time. After that first half-minute, the winner is whoever keeps showing up — seven live attempts in ten days, on more than one channel, then a month of light-touch nurture — without becoming a pest.

30s

The standard for the first human dial on every shared lead. Rise's text and email land in about 6 seconds; the call follows inside 30.

4x

Lift in contact rate from calling within the first minute versus the first hour.

80%

Of the time, the first contractor to make contact gets the appointment.

50%

Of homeowners prefer text or email to a phone call. The text opens the door; the call walks through it.

The three non-negotiables.

- ① **Under 30 seconds** on every shared lead. Thirty, never sixty.
- ② **At least six live touch points** before any lead leaves the active cadence. Six is the floor, not the retire point — the cadence makes seven dial attempts by Day 10.
- ③ **Leads don't die on the vine.** Forty-five days of work, then Rise owns the lead and it changes campaign. Nothing retires.

The contact sequence and the benchmarks on this page come from the Modernize onboarding deck (contact sequence; 30-second, 391%, 80%, 50% and 1 agent = 20 leads / 150 dials benchmarks).

Three habits that make the rule real

- **Dial inside 30 seconds of the alert.** The #leads alert and the desk list are the signal; the engine rings the desk the moment a lead lands. Two calls back to back ("double tap"), then move on.
- **Never skip a day of the cadence.** The task list decides what gets called today, not memory.
- **Log it or it didn't happen.** Set the **Status** or **Desk Category** after every dial — that record is how the automatic texts know to stop, and how we win credits from the vendor. Ticking "Called Today" alone does not stop the texts.

Four kinds of lead, one process

Lead type	What it is	How it's worked
Shared / rev-share web leads	Modernize, HomeBuddy, Networx and similar — the homeowner's request is sold to several contractors.	The full sequence below, starting inside 30 seconds. Speed decides who wins.
Exclusive web leads	Blue Fire, Home Appointments and similar — ours from the moment it posts.	Same rail, same cadence. Less racing, no less persistence.

Warm transfers / pay-per-call	ResultCalls — the homeowner calls us.	First contact is the call: the 90-second qualify-or-release rule in §4. No automatic text or email.
Owned	The website booking form, Google Local Services, desk-typed inquiries.	Same cadence; a self-booked time is confirmed by the desk (§5).

What happens automatically

Time	What happens	Who / what
0:00	Homeowner submits a request on a vendor site — or books a time on Rise's own online form (see "Booked online" below).	Vendor / homeowner
0:00–0:02	Vendor posts the lead to Rise's lead engine. It checks the ZIP is in our service area, the phone and email are valid, the consent record is present, and that it isn't a duplicate.	Engine
0:02–0:05	Lead is created in Salesforce and assigned to the confirmation desk. Salesforce posts it to #leads: New lead · Modernize · 11:04 AM MT · name · Denver 80205 · Windows .	Salesforce
0:05–0:08	Text #1 and Email #1 go to the homeowner , each with their personal link to pick a time online. The lead's first task says what actually went out (below).	Engine
0:08–0:30	The engine rings the desk with the lead's name and trade; answering connects the homeowner from the Rise desk line. Two tries back to back.	Engine → Desk
+4 hours	No reply and no contact yet → Text #2 , the no-reply nudge.	Engine
Any time	Homeowner texts back → logged on the lead in Salesforce ("Text reply: ...") and posted to #leads → call them.	Engine → Desk
Booked online	Homeowner picks a time on the form → the lead moves to Appointment Requested with a High-priority task "Confirm self-booked appointment" → the desk confirms by phone (\$5).	Form → Desk
On booking	Homeowner replies YES (or the desk books) → confirmation text.	Engine

Measured on the live system: Slack alert, text, email and the Salesforce log complete about **6 seconds** after the lead is created; the desk is ringing within 12–18 seconds. Vendors grade contractors on contact within 30 seconds and a text within 2 minutes of a missed call. The automated text and email guarantee we are first; the human dial inside 30 seconds is what sets the appointment. Speed to lead will win — the texts and emails back up the call, they don't replace it.

Who gets the automatic text and email. Every purchased web lead. **Callers don't** — a ResultCalls lead, whether the desk typed it in or the call tracking created it, has already talked to us, so it gets the #leads alert and the six call tasks and nothing automatic. The missed-call text below is for missed calls only. **Bad phone, good email:** when the text fails as unknown or unreachable, the email with the booking link becomes the primary channel; a landline gets calls only. A number found through a lookup service is **dialed by hand only — never auto-texted** (consent covers the number the homeowner entered).

The messages, word for word (live wording as of Oct 2)

All texts come from Rise's toll-free (866) 528-7644; the desk line (303) 827-0610 is named inside the text so the homeowner recognizes the callback. Texts send 8am–9pm Mountain every day (anything later queues for 8am); the desk is open Mon–Fri 9–4 MT and the copy names the next open day. Every first text carries STOP; opt-outs are honored instantly across every lead with that number. Texts use plain hyphens so they bill as one or two segments. [first name], [windows], [city] fill from the lead — a missing or junk name or trade falls back to "Hi there" and "your free estimate". [your link] is the homeowner's personal booking link.

TEXT #1 — DESK OPEN (MON-FRI 9–4 MT)

Hi [first name], it's Christina at Rise Renovation, BBB A+ rated with 4.6 stars from 300+ Google reviews. Pick a time for your free [windows] estimate here: [your link] Or we'll call you shortly from (303) 827-0610. Reply STOP to opt out.

(If a long name or trade would push the text to a third segment, the "BBB A+ rated ..." clause is dropped.)

TEXT #1 — DESK CLOSED (EVENINGS, WEEKENDS; HELD TEXTS GO AT 8AM)

Hi [first name], it's Christina at Rise Renovation, BBB A+ rated with 4.6 stars from 300+ Google reviews. Pick a time for your free [windows] estimate here: [your link] Or we'll call when we open [tomorrow / Monday] at 9am MT from (303) 827-0610. Reply STOP to opt out.

EMAIL #1 — SAME SECOND · FROM THE RISE MAILBOX, REPLY-TO CHRISTINA · SUBJECT: YOUR [WINDOWS] ESTIMATE REQUEST - RISE RENOVATION

Hi [first name],

This is Christina at Rise Renovation. Thanks for requesting a free [windows] estimate in [city]. We'll call you shortly from (303) 827-0610.

Pick a time for your free estimate → [your link]

If now isn't a good time, just reply to this email or text me at (303) 827-0610 with a day and time that works, and I'll get you on the calendar.

Talk soon,

Christina Perry · Confirmation Desk · Rise Renovation · (303) 827-0610

Rise Renovation is BBB Accredited with an A+ rating, and homeowners give us 4.6 stars across 300+ Google reviews. We're Great Place To Work Certified, a Qualified Remodeler Top 500 company, and based right here in Lakewood, CO.

Rise Renovation · 13949 W Colfax Ave, Suite 250, Lakewood, CO 80401

Desk closed: the first paragraph reads "Our desk is closed right now, so we'll call you when we open [tomorrow] at 9am MT, from (303) 827-0610." and the ask reads "You can also reply to this email or text me ...". The email also shows three photos of recent Rise work, the one matching the homeowner's trade first.

TEXT #2 — NO REPLY AFTER 4 HOURS

Still want the free [windows] estimate from Rise Renovation (BBB A+, 4.6 stars on Google)? Pick a time here: [your link] or reply with a day that works. Reply STOP to opt out.

MISSED-CALL TEXT — HOMEOWNER CALLED BACK AND MISSED US

Rise Renovation — sorry we missed your call about a [windows] estimate. Reply with a good time today and we'll call right back. Reply STOP to opt out.

ACKNOWLEDGEMENT — HOMEOWNER TEXTS YES OR A DAY OR TIME (NOT BOOKED YET)

Thanks [first name]! We'll call you shortly from (303) 827-0610 to set a time for your [windows] estimate.

Desk closed: "We'll call you when we open [tomorrow] at 9am MT, from (303) 827-0610, to set a time for your [windows] estimate." Nobody texts times back and forth — the desk calls and books.

CONFIRMATION REQUEST — ONCE A TIME IS SET

Hi [first name], Rise Renovation here — we have your [windows] estimate for [Thursday at 2:00 PM]. Reply YES to confirm, or 1 if an earlier time this week would be easier. Reply STOP to opt out.

CONFIRMED — AFTER YES

Confirmed: [windows] estimate [Thursday at 2:00 PM], [street]. A Rise scheduler will text the day before. Questions? Reply here.

STOP / HELP — CARRIER-REQUIRED

Rise Renovation: you're opted out and won't receive more texts. Reply START to opt back in.

Rise Renovation appointment & estimate texts. Msg frequency varies; msg & data rates may apply. Reply STOP to opt out. Help: riserenovation.com.

How replies are read before anyone looks

Homeowner says	The engine does
YES / OK / sounds good (appointment already set)	Marks the appointment confirmed and sends the Confirmed text.
YES, or a day or time ("Thursday afternoon", "tomorrow AM") — nothing set yet	Sends the acknowledgement; logs "proposed a time — call them" on the lead; posts to #leads.
"Reschedule" / "can't make it" / "a different day"	Treated like a proposed time — logged on the lead as "call them".
"Earlier" / 1	Logs "wants an earlier time"; posts to #leads.
STOP	Opts the number out everywhere, sends the STOP text, logs it.
Anything else	Logs "needs a human — call them"; posts to #leads. No automatic reply.

The desk never replies from the 866 number — call, or text from the (303) BeeTexting line.

Where the desk sees what went out

The first task on every lead says what actually happened, so nobody has to guess: Auto text + email sent (speed to lead) · Auto email sent - auto text goes out at 8:00am MT (quiet hours) · No auto text/email - came in by phone (ResultCalls) · Auto text NOT sent (after 9pm MT) - call at 9am · ... email not sent (no email) . Every later automatic touch and every homeowner reply is a completed task on the lead too (Lead → Activity).

Ten days of active work, a month of nurture, then Rise owns the lead.

The person owns the calls; the machine owns everything that repeats. Every purchased lead gets **45 days of work**: ten days of active cadence, a month of light-touch nurture, and then Rise owns the lead and it changes campaign. Peak answer windows are 8am–noon and after 5pm Mountain — that's where the dial blocks go.

Day 1–10 · the active cadence — seven dial attempts, six touch points minimum

Day	Calls (human)	Text (auto)	Email (auto)	Note
1	2 — first dial inside 30 seconds (double tap); second call 3–4 hours later, at a different time of day	#1 at second 5; no-reply nudge at +4h	#1 at second 5	A missed call is answered by the text that names the project
2	1 — different time of day than Day 1	Day-2 text	—	Never three touches in one hour
3	1 — different time again	—	Day-3 email	
4–5	2 — spaced out; urgency is cooling	Day-4/5 text	—	
6–7	—	—	Day-6/7 email	Last automated touch of the active window
8–10	1 — one last live attempt	"Last chance this week" text	—	Channel switch before nurture: calls failed → lean on text; text failed → email; everything digital failed → flag for a mailer. Building — week of Oct 5
10–45	Nurture — 35 days, five touches, texts and emails only. One touch a week, alternating: week 2 text · week 3 email · week 4 text · weeks 5–6 email, then a final "Still want the free estimate?" text. Christina-voiced, quiet hours and STOP apply, no cold calls and no AI calls . Any reply re-enters the reply loop and the active cadence. Building — week of Oct 5 Until it ships, the desk's Day-10 status keeps the lead on the nurture list.			
45	Rise owns the lead. It is never deleted; the status becomes "No contact — nurtured 45 days" and the lead leaves regular nurture for the specialized campaigns below. Leads don't die; they change campaign.			

The automatic follow-ups stop the moment Salesforce shows contact, a reply, an appointment or a dead status — which is why the desk logs the outcome of every dial. The automatic text that follows a desk call

("I just tried calling ...") fills the gap when a dial goes to voicemail.

Day 1 belongs to the desk

Both Day-1 calls are made by whoever is on the desk the moment the lead lands — the engine rings them with the lead's name and trade. Nothing else on the desk outranks a fresh lead for those two dials.

Days 2–10 come off the task list

Six "Cadence call N of 6 — Day D" tasks are created on every new lead automatically (owner = the lead owner; weekend due dates roll to Monday; closed as "(not needed)" the moment the lead is booked, dead or parked). "My open tasks due today" is the call list. Completing the task with the outcome **is** the log.

The follow-ups, word for word (live wording)

DAY-2 TEXT

Hi [first name], Christina at Rise Renovation (BBB A+ rated) again about your free [windows] estimate. Pick a time here: [your link] or reply with a day that works. Reply STOP to opt out.

DAY-3 EMAIL · SUBJECT: STILL WANT YOUR [WINDOWS] ESTIMATE? — RISE RENOVATION

Hi [first name],

Christina at Rise Renovation here — I've tried to reach you a few times about the free [windows] estimate you asked for at [street]. No pressure at all; I just don't want to leave you hanging.

Pick a time for your free estimate → [your link]

If you're still interested, reply to this email or text me at (303) 827-0610 with a day and time that works and I'll get you on the calendar. The visit takes about an hour, it's free, and there's no obligation.

Talk soon,

Christina Perry · Confirmation Desk · Rise Renovation · (303) 827-0610

DAY-4/5 TEXT

[First name], still happy to get you a free [windows] estimate from Rise Renovation (BBB A+ rated) - no pressure either way. Pick a time here: [your link] or reply YES and I'll call you. Reply STOP to opt out.

DAY-6/7 EMAIL · SUBJECT: CLOSING THE LOOP ON YOUR [WINDOWS] ESTIMATE — RISE RENOVATION

Hi [first name] ,

Last note from me — I haven't been able to reach you about the [windows] estimate, so I'll stop filling your inbox. Your request stays on file with us.

Pick a time for your free estimate → [your link]

Whenever the timing is right, reply here or text (303) 827-0610 and I'll set it up. Thanks for considering Rise Renovation.

Christina Perry · Confirmation Desk · Rise Renovation · (303) 827-0610

Every email carries the trust footer and the Lakewood address shown under Email #1. Day 8–10 and nurture wording is drafted in Christina's voice when those steps ship.

3b · After Day 45 — the lead changes campaign, it doesn't die

Every campaign below is automated text + email + social. No human until the homeowner replies; still no AI calls to anyone who hasn't engaged. Original source stays on the record; each campaign stamps itself as the sub-source (§7).

Aged-lead

Monthly or quarterly by age band — 45–90, 90–180, 180+ days. Seasonal text + email, one touch every 2–4 weeks.

Rehash

Quoted-not-sold or ran-no-sale. A quote-anchored text + email track; a reply goes back to the rep who ran it.

Weather-event

A live hail, high-wind, hard-freeze or snow-load event, raised by a real-time feed → within 24–48 hours the engine filters owned leads by ZIP and storm footprint → a storm-specific text + email series, social on the same schedule.

Promotion · financing · trend

A new offer, a rate change, a crew opening, or a live trend the feed surfaces → the matching segment gets the matching message.

Status: a later phase, after the Day 8–10 and nurture build. **Limitation today:** the automatic follow-ups and reminders run for vendor-posted leads; a lead the desk types in by hand gets the first text and email and the six cadence tasks, but no automatic follow-ups yet.

What to say, what to book, what to log.

Call-center best practice, in Christina's voice. She doesn't have to read it — it's the shape of a good call: ask where, lead with their request, offer two times, book, confirm, log. Every script assumes the homeowner already got the text that says "we'll call you shortly." Any set — a call, a text reply with a day, or a time picked online — moves the lead to **Appointment Requested**; the desk makes it **Appointment Set** once it's confirmed by phone.

LIVE ANSWER — DAY 1, INSIDE 30 SECONDS

"Hi [first name], it's Christina with Rise Renovation — you just asked for a free [windows] estimate online, so I'm calling right away. Quick one first: what's the address for the project? ... Perfect, that's right in our area. I've got a couple of openings this week — is Thursday afternoon or Friday morning better for you?"

If they pause: "It's a free, no-pressure look at the [windows] — about 60 to 90 minutes, and you'll have real numbers before we leave."

Never open with "I'm returning your call" — on a web lead that produces wrong-person calls. The homeowner asked online; say so.

BOOKING — LOCK IT DOWN

"Perfect — Thursday at 2. I've got [street], [city]. Will everyone who'd be part of the decision be home? Great. And it's [4 windows / the front of the house], right? You'll get a text from me in a minute confirming Thursday at 2, and a reminder the day before. Anything you'd like the estimator to know ahead of time?"

VOICEMAIL — DAY 1 (15 SECONDS; NAMES THE REQUEST; THE NUMBER TWICE)

"Hi [first name], Christina at Rise Renovation — calling about the [windows] estimate you requested for [street]. I just texted you a link to pick a time; or call me back at (303) 827-0610 — that's (303) 827-0610. Talk soon."

VOICEMAIL — DAY 3 (DIFFERENT TIME OF DAY)

"Hi [first name], Christina with Rise again. Still holding a spot this week for your free [windows] estimate at [street]. Text me a day, pick a time from the link I sent, or call (303) 827-0610 — happy to work around your schedule."

VOICEMAIL — DAY 8-10 (LAST LIVE CALL; LEAVE THE DOOR OPEN)

"Hi [first name], Christina at Rise Renovation. This is my last call for now on the [windows] estimate — no pressure at all. If the timing's better later this month, just text me and I'll set it up. (303) 827-0610. Take care."

How we talk about Rise. Say **"BBB A+ accredited"**, **"4.6 stars on Google, 300-plus reviews"**, **"Great Place To Work Certified"**, **"Qualified Remodeler Top 500"**, **"based in Lakewood"**. Never quote a BBB review score, never "decades of experience" (Rise started in 2022), and nothing that sounds like door-to-door selling. Say the company name slowly — "Rise Renovation" — on voicemails and to call screeners; it is misheard more than you'd think.

When they push back

They say	Christina says
"I'm just getting quotes."	"Perfect — that's exactly what this is. It's free and you'll have Rise's number to compare against. Thursday or Friday?"
"I already have someone coming out."	"Great — get a second set of eyes. Most of our customers had two or three quotes; ours takes about an hour. Would after theirs work, or before?"
"What's it going to cost?"	"Honest answer: it depends on the windows and the house, and I'd rather give you a real number than a guess. That's what the visit is for. Thursday or Friday?"
"I only need one window fixed."	"Thanks for telling me — we replace rather than repair, and our smallest project is four windows, or two plus a sliding door. If you ever look at doing more, I'd love to come out." (Log it: repair-only is not what we sell, and not a credit.)
"I didn't request anything."	"No problem — you'd have filled out a form on [the site] about [windows] at [street] . If that wasn't you, I'll take you off our list right now." (Then log it — this is a possible credit.)
"Not right now."	"Totally fine. When's better — a couple of weeks, or after the holidays? I'll put a note in and reach back out then." (Set the follow-up task.)
"Just email me something."	"I'll send it now. Fair warning, it's a range — the estimate visit is what makes it real. Want me to hold a tentative slot while you look?"

Inbound calls from a pay-per-call vendor — the 90-second rule. Vendors like ResultCalls bill for a connected call once it runs past about 90 seconds; a shorter call is creditable. So the first minute of every inbound call is a **qualify-or-release** minute, in this order, before any selling:

1. **Where** — "What's the address or ZIP for the project?" (in our service area?)
2. **What** — "And this is for windows / roofing / a bath?" (a trade we sell? replacement, not repair?)
3. **Who** — "Are you the homeowner?" (a single-family home — apartments and condos are a dead lead and a credit)
4. **How much** — "Roughly how many windows?" (meets the minimum: 4 windows, or 2 + a sliding glass door)

Insurance-claim work, storm or hail claims, and anything medical or unrelated fail the test too. Any answer that fails → end warmly inside 90 seconds: "I appreciate the call — that's outside what we do, so I don't want to waste your time. Best of luck with it." Then log **Dead NO CREDIT** with the reason, same minute. A qualified caller gets the booking script above. Moving fast here isn't rude; it's what keeps bad calls off the invoice.

Non-negotiables on every call

- **Ask the service area first.** One question, before the pitch — it saves the homeowner's time and ours.
- **Book on the call.** Confirm the address, who needs to be home (all decision-makers), and the project. Windows minimum: 4 windows, or 2 windows plus a sliding glass door (one door counts as two windows).
- **Offer two times, never an open question.** "Thursday or Friday?" closes; "when's good?" stalls.
- **Log every attempt the moment it ends** — set the Status or the Desk Category, with the outcome and the next step. The automatic texts read those two fields; "Called Today" alone keeps them going. The vendor will not credit a lead we can't show we worked.
- **Set the status honestly:** New – Inquiry → No Contact Made → Appointment Requested → Appointment Set → Dead, or Dead NO CREDIT when the lead was bad.
- **Anything odd** — wrong trade, out of area, disconnected number, prior customer, "remove me" — note it on the lead and flag it in #leads the same day. That's the credit clock starting. A "remove me" or STOP comes out of every call list immediately.
- **Test leads** (TEST, Jack Doe, Jenny Doe) are never called.

Protect what we booked. Get paid back for what was bad.

Appointments

- **Confirmation text the same day**, then two automatic reminders from the appointment time in Salesforce: the **day before** ("Reminder from Rise Renovation: your [windows] estimate is [Thursday at 2:00 PM] at [street]. Reply YES to confirm, or reply with a better time if you need to reschedule.") and the **morning of** ("Rise Renovation — see you today at [2:00 PM] for your [windows] estimate. Please have everyone who'll be part of the decision home."). The **Appointment Time** field (date and time) is what the reminders and the reports read — set it the moment a time is booked.
- **Self-booked appointments.** A homeowner can book their own estimate on Rise's online form — five steps, 10am / 2pm / 6pm Mountain slots, Monday to Saturday. It lands as **Appointment Requested** with a High-priority task "Confirm self-booked appointment". The desk confirms by phone — the time, every decision-maker home, the address, the project minimum — then sets **Appointment Set** and assigns the rep.
- **Confirmation Status drives dispatch.** A set appointment not confirmed by the day before gets a call. Voice-AI confirmation calls come in October, only for homeowners who have engaged.
- A no-show is not a dead lead: re-book within 24 hours, two attempts, then hand back to the desk.
- **Every set appointment is reported back to the vendor weekly, automatically** (Thursdays) — Lead ID, appointment, demo, sold, net job sold, credits flagged. That report is how we win credits and how the vendor tunes what they send us.

Replies

Every homeowner text lands on the lead in Salesforce as a completed task ("Text reply: ...") and in #leads. Either one means the same thing: call them. "Reschedule", "can't make it" and "a different day" are read as a proposed time — call them.

Credits

Form leads: most vendors credit leads that are out of area, duplicates, the wrong trade, or wrong / disconnected numbers — **if we ask inside their window (typically 10 days) with the Lead ID and a reason.** The desk flags it by setting **Dead NO CREDIT** with a note; Growth Mindset files the claims as a weekly list and tracks each one to its answer. Repair-only requests and homeowners we simply couldn't reach are ours to keep — that is the cost of the model, and why the cadence matters.

Issue rate = leads marked Dead NO CREDIT ÷ leads delivered (wrong number, out of area, wrong trade, duplicate, no consent). Over 25% for a source is a red line: pause the source and claim the credits (§7).

Pay-per-call: a call that ends inside ~90 seconds is creditable; a qualified call that runs longer is billable whether or not it books. Disqualify fast, log Dead NO CREDIT with the reason, and Growth Mindset files the credit the same week.

Humans make first contact. Machines do everything that repeats. Mission Control watches.

Vendor consent on a purchased lead covers texts and human calls, not AI-placed calls to a homeowner who hasn't spoken to us yet. So **AI voice never makes first contact** — every outbound call to a homeowner who has not engaged is a live human, with the texts and emails automated behind it. AI voice enters once the homeowner has **engaged** — spoke with a person, replied with a time, **or self-scheduled online** (a self-booked appointment counts; AI may confirm it with no prior human call) — and only for confirmations, reminders, reschedules, no-show recovery and after-hours callbacks.

When	Touch	Owner	How	Status

Day 2, 3, 4–5, 6–7	Follow-up texts + emails	Engine	Scheduled job; stops on contact / reply / appointment / dead	LIVE
Day 4–5	Calls 5–6	Desk	Cadence tasks	LIVE
Day 8–10	Call 7 + "last chance" text + channel switch	Desk + Engine	Scheduled job + task	Week of Oct 5
Day 10–45	Nurture — 5 texts/emails	Engine	Scheduled job	Week of Oct 5
Day 45+	Aged · rehash · weather · promo campaigns	Engine	Campaign segmenter + feeds	Later phase
On booking	Confirmation text	Engine	YES → Confirmed	LIVE
Day before / morning of	Reminder texts	Engine	From the Salesforce appointment time	LIVE
Day before	Confirmation call	Voice AI (engaged homeowners only)	Retell → Salesforce + #leads	October

No-show	Re-book x2 in 24h	Voice AI, then desk	Retell + task	October
After hours	Inbound callbacks	Voice AI answers, books a callback window	Retell inbound	October
Any reply	Classify, log, alert	Engine	Reply → Salesforce task + #leads	LIVE

Voice AI takes over (in this order)

1. Day-before confirmation calls · 2. Reschedules — offers two slots, books, re-confirms · 3. No-show recovery · 4. After-hours inbound · 5. Nurture and the after-45 campaigns stay text, email and social — a live call happens only on a reply.

Voice AI never does

First contact on a purchased lead, anything before the homeowner has engaged, pricing or scope conversations. Those stay human. Voice agents run on a pinned model version inside Retell, like every other AI in the flow.

Who runs it — Mission Control

One decision-making AI, one rules engine, one reviewer, and fixed automation for every stage — the leads keep moving with every AI switched off. People make every live first call and approve what the machine proposes.

Role	What it does	What it never does
The Conductor	The only decision-making AI. Reads Salesforce — counts, rates and record IDs — spots what's slipping, and proposes fixes (a reassignment, a source to slow down, a campaign wave) to the people below.	Dials or texts a homeowner. Sees a homeowner's name, phone or address. Acts on anything that isn't approved or pre-approved.
The Sentinel	Plain rules, no AI, every 15 minutes: a lead with no touch in 30 minutes, a source gone silent, a first dial over 30 seconds, an unconfirmed appointment, a stuck hand-off. Catches a broken step inside 15 minutes and pages Matt.	Guess. If a rule isn't written, it isn't a check.
The Red Team	A daily reviewer that hunts for the leak nobody wrote a rule for yet and turns it into a new Sentinel check (Matt approves).	Change the live system on its own.
Fixed automation	Every stage of §2–§3 and §5: the first text and email, the ring to the desk, the cadence tasks, follow-ups, reminders, the reply loop, the #leads posts, the weekly vendor report.	Need an AI to run. It keeps going with every AI paused.
Voice agents	Confirmations, reminders, reschedules, no-show recovery, after-hours — for engaged homeowners only.	First contact.

Approvals. Matt approves anything involving spend, vendors, new message copy, or anything Nick sees. **Christina** may approve desk-operations proposals — a batch reassignment, reopening parked leads, launching an already-approved campaign wave, pausing a source that is flooding the desk — when Matt has not answered within 2 hours. **Pre-approved plays** run on their own and are logged with one client-safe line in #leads: a reduce or pause on a vendor red line, a pre-approved weather-event or aged-lead wave, a single reassignment, a credit claim.

The kill switch. PAUSE ALL, from Matt's phone, stops every automated action — campaign waves, voice outbound, autonomous plays — in seconds. The first text and email to a new lead and the Sentinel's checks keep running. Each role can be paused on its own too.

Rules for every AI in the flow, voice included: pinned to a dated model version with no automatic upgrades; a new model is promoted only after a replay of the last four weeks and a two-week shadow run. **No homeowner name, phone or address is ever sent to the decision-making AI** — it works from counts, rates and record IDs. **Quiet hours:** after 8pm Mountain only critical checks page anyone; everything else waits for the 8:30am Mountain morning read.

Capacity — the honest math

Per lead, the human work is seven dial attempts (about two minutes each with logging) plus live conversations — roughly 15–20 minutes over ten days. Industry rule: **one agent = 20 leads a day = 150 dials**. Ten new leads a day is ~60–70 dials and ~2.5 human hours; fifteen a day (~90–105 dials, ~3.5 hours) is the ceiling for two part-time hands; 20–25 a day is a full-time inside-sales seat.

Staffing plan. Now: the desk owns Day 1 and inbound, with a fixed afternoon block for the Day 2–5 calls. **Trigger to add a person:** five straight weekdays at 15+ new leads/day, or the day volume steps up with the next vendor or a cap increase. **The profile (changed Sept 27): a seasoned inside salesperson who knows how to work internet leads**, not an entry-level dialer; remote is fine; paid at the top of the market (base + per-sit + close bonus; Nick sets the numbers). No outsourced answering or appointment-setting shops.

The control system and the numbers.

The control system

- **Cadence tasks, created automatically.** Six call tasks with due dates land on every new lead. "My open tasks due today" is the call list; completing the task with an outcome is the log.
- **The desk list view** ("Internet Leads – Desk") stays the Day-1 cockpit: new leads, Called Today, Desk Category, Desk Note. The Home page is the desk dashboard (Appendix).
- **The 4:30pm Mountain "Desk check" in #leads, every weekday:** today's intake by source · cadence calls still open, by owner · leads with no logged call after 24 hours · sales today and month to date. Non-zero on the open lists two days running gets raised.
- **The vendor disposition report** runs every Thursday morning, automatically — the same data as the scorecard, so the reporting is free.
- **The ledger of record is the "Rise Lead Master Ledger"** — a Google Sheet in the shared drive that fills itself from Salesforce every hour: leads, contacted, set, sits, sold, cancels, gross and net by day, source and owner, with the red lines below shading red on their own. The Friday brief reads from it.

Definitions we hold to

Term	Means
Contact made	A live human conversation — the moment Rise owns the lead.
Engaged	A text reply, a proposed time, or a self-scheduled appointment. Its own column — and the gate for AI voice.
Set rate	$\text{Appointments set} \div \text{contacted}$.
Issue rate	$\text{Leads marked Dead NO CREDIT} \div \text{leads delivered (wrong number, out of area, wrong trade, duplicate, no consent)}$.
NLSA %	$\text{Net leads sold} \div \text{leads delivered} = \text{sold} \div \text{leads}$.
Speed to lead	Seconds from the lead landing to the homeowner being dialed. Standard: 30.
Attribution	The original source is written once and never changes; every later campaign (nurture, aged, rehash, weather, promo) is stamped as a sub-source on the lead and carried to the opportunity — Salesforce shows both the source that bought the lead and the one that made the sale.

The red lines — per source, per month

40%

Contact rate below this is red

35%

Set rate (of contacted) below this is red

80%

Set-to-confirmed below this is red

25%

Bad-lead / credit rate above this → pause the source, claim the credits

15%

Marketing cost as a percent of net sales above this is red

30s

Speed to lead above this is red

Two straight weeks in the red → review with the vendor, then pause if it doesn't move. Volume never overrides quality. Six logged attempts (or a booked appointment) before any lead leaves the active cadence; no lead leaves the program before Day 45.

The sales numbers — gross, installed, net

Every purchased lead is judged through to the money, on the stages Rise already runs in Salesforce. Three words, three meanings: **Won** = signed at the table · **Closed** = installed and collected · **Lost** = no-sale at the demo, or a signed job that cancelled (rescission or later). Net is the one marketing cost is measured against; **net sales growth** = closed dollars, trailing 30 days vs the 30 before.

Number	What it means	Where it lives in Salesforce
Gross (won / signed)	The contract is signed at the kitchen table. Counts from the PII stage on.	Sold Amount on any won stage · report Gross sales – sold \$ by source
Installed (closed)	The job is installed and invoiced.	Stage = Closed Won · report Net sales – installed \$ by source
Lost after the sit	The project was canceled (rescission or later) or financing was declined.	Appointment Outcome = Project Canceled or Finance Decline — the Cancelled box checks itself and the Cancelled Date stamps itself · report Cancels + finance declines by source
Net	Installed minus canceled. Marketing cost as a percent of net is the number the program is held to.	Lead Engine dashboard — the row under gross

How to keep it true — two habits, nothing to fill in. Set the **Appointment Outcome** the day you know it (Accepted, Pitch Miss, No Pitch, Project Canceled, Finance Decline) and move the **Stage** the day it happens. The reports read those two fields and nothing else. Rise's installed/collected stage and cancellation rule will sharpen "closed" once confirmed — one formula and one filter move.

The boards, by seat.

Three seats, three screens. Everything below reads the same Salesforce records the desk fills in — there is nothing to type twice.

Seat	Where to look	What it answers	What good looks like
Christina — the desk	Home page dashboard "Internet Leads – Christina" · list views Internet Leads – Desk (still working) and Awaiting confirmation · Today's Tasks	Leads today · not yet called · appointments set · cadence calls open by owner · text replies this week · appointments in the next 7 days by confirmation status. Lead → Activity shows every automatic touch and every reply.	Nothing in "not called" by 4:30 MT; every appointment inside 7 days Confirmed by the day before.
Nick — the owner	Dashboard "Rise Lead Engine" · the Rise Lead Master Ledger (shared drive)	Volume by source and status · appointments set · gross sales, installed (net) sales and cancels by source · contact %, set %, NLSA % by source and week.	Red lines in \$7 all clear; net rising month over month.
Matt — Growth Mindset	Report "Cadence calls — all, by owner" · the ledger · the Sentinel's alerts	Is the cadence being worked, by whom, and where is the hand-off breaking.	Zero overdue cadence calls at the 4:30 MT desk check.

Not on the board yet

- **Marketing cost as a percent of net** — arrives when the engine stamps each lead's acquisition cost onto the record (in build).
- **Closed = installed and collected** — waits on Rise's installed/collected stage and cancellation rule (asked of Nick).
- **Speed-to-lead by lead** — measured on every desk call today; a tile for it is coming with the Sentinel.

Every tile, report and list view, with its link and filters, is described in the field guide "Salesforce boards and reports" in the shared drive's 01_Playbook folder.

This document evolves. Wording changes when the desk improves it; steps change when the data says so. The version in the shared drive is the current one, and every change is dated. If what you're doing doesn't match this page, one of the two needs to change — say so in #leads.
